

DIANE WHORTON

I am a native San Diegan and have two adult children, a son and daughter who both live in San Diego. I was born into a family construction business specializing in residential renovations, new construction as well as commercial renovations. Construction fever has remained a key ingredient in my life.

My background consists of:

- Over 15 years specializing in commercial property rehabs, space planning and project management
- Project Management: Renovations of state buildings consisting of removing walls, plumbing, electrical, redirecting data and voice cabling
- Contract development and over-site: Scope of Work, bid packages, and payment authorization/clearance. Contracts i.e. roofing, plumbing, electrical, security, maintenance and emergency generator
- Space Planner – Analyze, draft and develop space utilization plans for open concept office space to maximize spaces for increasing staff – panel systems
- 5 years Telecommunications Manager during construction of a 350,000 square foot 3 building property
- Design and installation of data and telephone systems for 1500 employees
- Energy Coordinator – liaison between agency and utility companies with regards to energy conservation efforts and blackout situations

My family's construction background and my work experience have provided me with the skills and desire to work with properties focusing on GREEN rehabs providing an energy efficient and environmentally safe property to the consumer.

The current market has created an opportunity to repair the damage done by the economy and lack of attention to the environment. Green-Habbing benefits the buyer by providing a monthly energy savings and a healthier environment.

There is a Home in the Future for everyone! Join me, let's work together and move forward to find it.

Each day in life there is a lesson to be learned. We are the teachers and the students.
